	Aerosol / Wick / Gel	hyscent
Product material	Liquid / propane / gas	Dry vapor
Harmful ingredients	Alcohol, acetone, solvents	✕
Skin irritation	✓	✕
Respiratory irritant	✓	✕
Spillage and residue	✓	✕

What are our refills made of?

The Hyscent refills are made from a Proprietary Polymer Blend infused with pure essential oils. The essential oils in our refills are infused at the molecular level and are released evenly throughout the life of the refill.

Over four years of development and research have allowed Hyscent to offer one of the most technologically advanced fragrance products in use today. Absent of Propellants, Petroleum Distillates and Harmful Solvents, Hyscent delivers pure, natural "Essential Oil" fragrance untainted by additional chemicals. Because the refills are completely dry, there are no spills, mess or wasteful evaporation.

Are our fragances safe?

Yes. These fragrances are safe under conditions of anticipated use. In addition to a long history of safe use, a well-established program exists within the fragrance industry for objective, scientific evaluation of the safety of its materials and this is supported by governmental requirements that establish expectations for safety substantiation of fragrance products. Hyscent complies with the industry standards set by IFRA, the International Fragrance Association and (RIFM) Research Institute for Fragrance Materials

Are our refills flammable?

NO! The Hyscent refills rate a zero (0) in both the HMIS and NFPA ratings system. The flammability rating for Gels, Liquids and Aerosols vary from two (2) to four (4).

Do our refills contain harmful Volatile Organic Compounds?

All Hyscent refills are VOC compliant and ecofriendly.

Do refills leave residue or cause corrosion?

No. The completely dry refill leaves no residue whatsoever and has no corrosive effects.

How do refills combat malodor?

All Hyscent refills contain Odoraxe™, a Malodor Technology scientifically designed and tested to effectively counteract unpleasant odors, actually neutralizing malodors rather than simply "masking" them. Odoraxe™ is effective against malodors such as tobacco smoke, bathroom smells, body malodor, pet, mildew, kitchen and cooking smells. Even when you can no longer smell the fragrance Odoraxe™ continues to be effective and counteract malodors.
